

**Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri**

Department of Computer Science

T.Y.B.Sc.(Computer Science) Sem-VI

Subject: Software Testing

Question Bank

# **Chapter 1: Introduction to Software Testing**

## **Short Answer Questions**

1. Define software testing.
2. What is fault?
3. Define the term error.
4. What is software failure?
5. What are the objectives of software testing?
6. List any two objectives of software testing.
7. What are testing metrics?
8. What do you mean by testing measurement?
9. Define debugging.
10. Define verification.
11. What is validation?
12. What is Software Testing Life Cycle (STLC)?
13. List the phases of STLC.

## **Long Answer Questions**

1. Write differences between bugs, faults and failures.
2. Compare testing and debugging.
3. Compare verification and validation.
4. Explain the objectives of software testing.
5. Describe the principles of software testing.
6. Explain testing metrics and measurements.
7. Explain the Software Testing Life Cycle (STLC) in detail.

# **Chapter 2: Software Testing Strategies & Techniques**

## **Short Answer Questions**

1. What is testability?
2. List characteristics of testable software.
3. What is test case design?
4. What is control structure testing?
5. What is boundary value analysis?
6. What is equivalence partitioning?
7. Write goal of white box testing.
8. Write methods of white box testing.
9. Write two methods of Black Box Testing.
10. Define cyclomatic complexity.
11. What is stub?

## **Long Answer Questions**

1. Write short note on black box testing.
2. Explain white box and black box testing.
3. Write difference between white box and black box testing.
4. Explain equivalence partitioning.
5. Describe basic path testing with example.
6. What is cyclomatic complexity and graph matrix? Explain with example.
7. Explain characteristics of testable software.
8. Explain black box testing techniques with examples.
9. Explain white box testing techniques.
10. Explain test case design for desktop, mobile and web applications using Excel.

# **Chapter 3: Levels of Testing**

## **Short Answer Questions**

1. List levels of testing.
2. Write goal of unit testing.
3. What is unit testing?
4. What is integration testing?
5. What is system testing?
6. Define acceptance testing.
7. Define alpha testing.
8. Define beta testing.

9. What is usability testing?
10. What is accessibility testing?
11. What is compatibility testing?
12. What is configuration testing?
13. What do you mean by performance testing?
14. Write advantages of load testing.
15. Define regression testing.

## **Long Answer Questions**

1. What is unit testing? How does it work? Explain with example.
2. What is integration testing? Explain top-down integration.
3. Explain bottom-up integration.
4. Explain various types of system testing.
5. Differentiate between alpha and beta testing.
6. Explain various forms of acceptance testing.
7. Explain load testing and stress testing.
8. Write advantages of regression testing.

# **Chapter 4: Testing Web Applications**

## **Short Answer Questions**

1. Define web application testing.
2. Define strategy for web applications.
3. What are dimensions of quality in web applications?
4. What types of errors occur in web applications?
5. What are components of test planning?
6. What is test plan?

## **Long Answer Questions**

1. What is web application? How does it work? Explain with diagram.
2. Explain testing strategy for web applications.
3. Explain dimensions of quality in web applications.
4. Explain errors in web application environment.
5. Explain test planning in web application testing.
6. Explain navigation testing in detail.

# **Chapter 5: Agile Testing**

## **Short Answer Questions**

1. What is Agile methodology?
2. What is Agile testing?
3. List any two Agile principles.

4. Which is a core Agile principle?
5. What are Agile values?
6. Write difference between Agile and Traditional testing.
7. What is automated testing?
8. List Agile testing quadrants.
9. Write objective of spike testing.

## **Long Answer Questions**

1. Write features of Agile testing.
2. Explain Agile testing methodology.
3. Explain Agile principles and values.
4. Explain Agile testing quadrants with diagram.
5. Explain automated testing in Agile development.
